

**METHOD, APPARATUS AND COMPUTER PROGRAM PRODUCT FOR  
IMPLEMENTING ENHANCED NOTIFICATION AND CONTROL  
FEATURES IN OSCILLOSCOPES**

Abstract of the Disclosure

- 5           A method, apparatus and computer program product are provided for  
implementing enhanced notification and control features in an oscilloscope.  
User selected notification options and user selected control options are  
stored. When a predefined event is identified, the user selected notification  
options are used for notifying a remote user of the identified predefined  
10 event. The user selected control options are used for receiving user  
selections enabling the user to remotely control oscilloscope operational  
settings. The user can be notified with a telephone call, an email or a pager  
text message and the user can change operational settings using a  
telephone call or an email containing commands.
